T-24 Documentations

Need help getting your construction permits?

Title 24 of the California Code of Regulations, known as the California Building Standards Code or just "Title 24," contains the regulations that govern the construction of buildings in California. New construction or renovations of buildings require architects, engineers and designers to account for energies gains and losses. This type of documentation requires the use of complicated software.

Galicia commissioning group has a dedicated team whose main task is to stay current with energy building codes and approved software. Let us worry about the compliance documentation so you can focus on your client's design needs. Whether you are a large firm with a large staff and are contemplating on sending the Title 24 portion to a third-party or whether you are a small business owner who does not have the time to keep up with continually changing energy regulations, Galicia Commissioning Group, Inc. can provide relief by taking on this task.
