Francisco brings over ten years of Mechanical Engineering experience and over 15 years of operations manager experience. He began his career operating all aspects of his father's business. He managed to grow their company and open multiple offices both domestic and international. At the same time, he continued his education where he obtained his Bachelor's degree and shortly followed his Master's degree in Mechanical Engineering. Francisco has had many years of experience running simultaneous projects and overseen them to full completion. His expertise includes project planning, procurement, writing standards, procedure documentation, client relationship, safety procedures, research and development, cost analysis, and prototyping testing.

As Commissioning team manager for Galicia Commissioning Group, Francisco provides coordination between the team and clients. Francisco concentrates on the lean operation, maintenance and reliability of each building. His concentration areas are in California T-24 reports, Computational fluids dynamics (CFD) Analysis, Vibration Analysis, ASHRAE Building Audits. He oversees that at the end of the project the commissioning team has produced a standardized and comprehensible documentation to assist future or current building engineers.
